

warpcore::MultiValueHash
Table::load_factor

warpcore::MultiValueHash
Table::num_values

warpcore::MultiValueHash
Table::size

```
graph LR; A[warpcore::MultiValueHash Table::load_factor] --> C[warpcore::MultiValueHash Table::size]; B[warpcore::MultiValueHash Table::num_values] --> C;
```

The diagram illustrates a mapping from two source attributes to a single target attribute. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'warpcore::MultiValueHash Table::load_factor' and the bottom box contains 'warpcore::MultiValueHash Table::num_values'. On the right, there is a gray rectangular box with a black border containing the text 'warpcore::MultiValueHash Table::size'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both 'load_factor' and 'num_values' are used to determine the 'size' of the 'warpcore::MultiValueHash Table'.
